Badge Policy

Emerald Coast Technical College has incorporated an Identification Badge Policy to enhance the safety and security of our campus. All school personnel and students must wear the badges in a conspicuous place at all times while on campus.

Student's badges must have the Emerald Coast Technical College Student ID number on the badge and expected program completion/graduation month and year and a current clear picture.

Main doors are equipped with card readers. All staff and students must wear their school badge at all times. Badges are used to access entrance into the main doors. Exterior doors are to remain locked at all times. Students are reminded that ECTC badges are an important element of campus safety and security. Student, faculty, and staff badges should be displayed prominently when on campus. Students may be delayed and questioned regarding their business on campus if no student badge is displayed. Students should be issued the required badge when registering for classes each school year. Students will also be issued a badge when enrolling in a new program. Students are not to allow others to come in the door when they are using their badge. This is known as tailgating and is not permitted. If someone is knocking on the door, please direct them to the badge access doors for proper entree.

If the badge is determined to be a safety issue during some labs they can be removed while the students are engaged in the lab but reattached upon the completion and/or when student leaves the lab area.

As a reminder, replacement badges are \$10.00 through Student Services.
